

Paired comparison on identical instances (budget 10,000 steps, sampling inference)

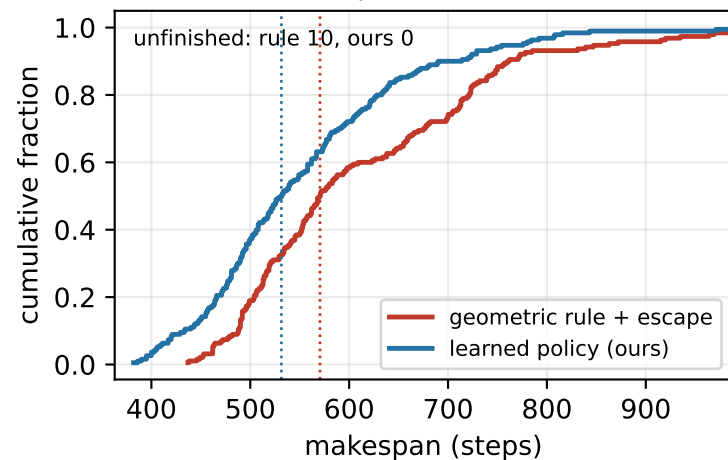

4 drones / 50 dests (seen)
237 paired rollouts

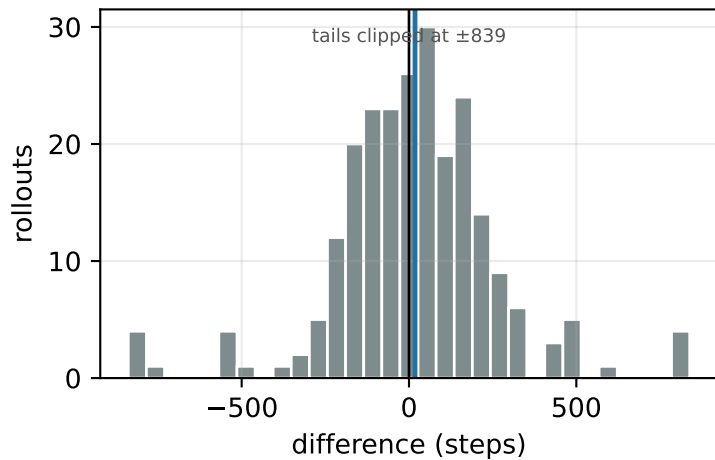

3 drones / 30 dests (unseen)
200 paired rollouts

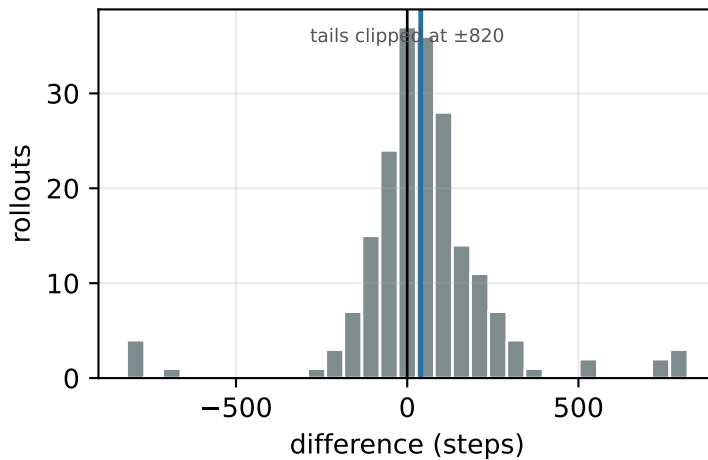

5 drones / 50 dests (unseen)
190 paired rollouts

paired difference (learned - rule)
median +18, 109 wins / 127 losses, $p=0.172$

paired difference (learned - rule)
median +40, 73 wins / 127 losses, $p<0.0001$

paired difference (learned - rule)
median -54, 141 wins / 45 losses, $p<0.0001$
